Subject **D2L:HW4 assignments from the contribution teams to be used forMiniProject**

Please review the attached documents to prepare for the group to work together to develop one set of requirements for the system, updated UC diagram, and domain model (with data dictionary).

Action Items (*starred items to be completed before March 10):

1. * Meet to introduce each other (and answer questions about the respective HW4 artifacts)
2. * Collaborate to develop the "updated" set of requirements for your system
3. * Update UC diagram and descriptions
4. * Create Domain Model, including data dictionary entries
5. Discuss and work on rapid prototype that captures new set of requirements
6. * Review SRS template (see course website) and assign who will work on the different sections.
7. * Set up a weekly meeting time to discuss progress of SRS, models, and prototype,
8. * Set internal deadlines for completing the milestones and assignments
9. * [Optional:] You may find it useful to appoint/elect/self-nominate someone as the Project Manager, whose primary role is to ensure that all the
